9. **RENEWAL TERMS:** With thirty (30) days written notice, as defined in Paragraph 18, either party may terminate this agreement at the end of the initial term, but if no notice is given, then the agreement will be extended on a month-to-month basis on the same terms and conditions contained in this agreement. Tenant, or any member of Tenant's family, guest or other person under the Tenant's control, shall not engage in or facilitate criminal or drug related activities. Any such violation constitutes a substantial violation of the Lease and a material noncompliance with the Lease and is grounds for termination of tenancy and eviction from the premises.

It is specifically understood that Tenant will, at Tenant's expense, keep sinks, lavatories, and commodes open, reporting any initial problem within five (5) days of occupancy, repair any and all damages caused by tenancy and replace any burned out light bulbs. Tenant agrees to report to Landlord any malfunction of or damage to electrical, plumbing, HVAC systems, smoke detectors, and any occurrence that **may** cause damage to the property. 13. **MAINTENANCE OF PREMISES, PEST CONTROL:** Landlord agrees to make repairs and do what is necessary to keep the premises in a fit and habitable condition as specified in South Carolina Residential Landlord and Tenant Act. The Landlord further agrees to maintain in reasonably good and safe working condition, all electrical, gas, plumbing, sanitary, HVAC, smoke detectors and other facilities supplied by him. Landlord is not responsible for changing batteries in smoke detectors.

Tenant shall report any pest problem within three (3) days of possession. Tenant's failure to identify any pest infestation with said three (3) days shall constitute Tenant's agreement that premises has no infestation of any kind. Tenant is responsible for reporting any suspected or known termite infestation but is not responsible for termite control. Any future infestation of any kind, less termites, shall be the responsibility of Tenant Landlord.

14. **ESSENTIAL SERVICES AND APPLIANCES:** The Landlord is required to provide essential services; meaning sanitary plumbing or sewer services; electricity; gas, where it is used for heat, hot water, or cooking; running water, and reasonable amounts of hot water and heat, except where the building that includes the dwelling unit is not required by law to be equipped for that purpose, or the dwelling unit is so constructed that heat or hot water is generated by an installation within the exclusive control of the Tenant and supplied by a direct public utility connection. The following appliances present in the dwelling unit are specifically included by this rental agreement as being deemed to be supplied by the Landlord: stove, refrigerator, dishwasher, disposal, washer, dryer, microwave, trash compactor, other: _____.

15. **INSURANCE:** Tenant shall be responsible for insuring his/her own possessions against fire and other catastrophes. Landlord and Tenant hereby release each other from liability for loss or damage occurring on or to the leased premises or the premises of which they are a part of the contents of either thereof, caused by fire or other hazards ordinarily covered by fire and extended coverage insurance policies and each waives all rights of recovery against the other for such loss or damage. Willful misconduct lawfully attributable to either party, whether in whole or in part a contributing cause of the casualty giving rise to the loss or damage, shall not be excused under the foregoing release and waiver.

16. **RIGHT TO ACCESS:** The Tenant shall not unreasonably withhold consent to the Landlord to enter into the dwelling unit in order to inspect the premises; make necessary or agreed repairs, decorations, alterations, or improvements; supply necessary or agreed services; or exhibit the dwelling unit to prospective or actual purchasers, mortgagees, tenants, workmen, or contractors.

The Landlord or Landlord's agent may enter the dwelling unit without consent of the Tenant:

- (a) At any time in case of emergency, including but not limited to prospective changes in weather conditions which pose a likelihood of danger to the property may be considered an emergency; and
- (b) Between the hours of 9:00 a.m. and 6:00 p.m. for the purpose of providing regularly scheduled periodic services such as changing furnace and air-conditioning filters, providing termite, insect, or pest treatment, and the like, provided that the Landlord announces intent to enter to perform services; and
- (c) Between the hours of 8:00 a.m. and 8:00 p.m. for the purpose of providing services requested by the Tenant and that prior to entering the Landlord announces intent to enter to perform services.

The Landlord shall not abuse the right of access or use it to harass the Tenant. Except for section 16(a), 16(b), and 16(c), the Landlord shall give the Tenant at least 24 hours notice of intent to enter and may enter only at reasonable times.

The Landlord has no other right of access except: pursuant to court order, as permitted by the South Carolina Residential Landlord and Tenant Act when accompanied by a law enforcement officer at reasonable times for the purpose of service of process in ejectment proceedings, or unless the Tenant has abandoned or surrendered the premises.

TENANT TENANT AND LANDLORD HAVE READ THIS PAGE.

to the Landlord, along with thirty (30) days written notice of intent to vacate and payment of all rent to the expiration date of such written notice, and any miscellaneous charges in arrears, terminate this Rental Agreement. Normal enlistment termination or other type discharge from Armed Forces, unless due to conditions beyond the service member's control, or acceptance of government quarters is not a permanent change of station and is not justification for lease termination. Withholding knowledge of pending transfer or discharge at time of entry into this Rental Agreement voids any consideration or protection offered by this section.

18. **DEFINITION OF "THIRTY (30) DAY NOTICE":** Any written notice given by either party to the other party in order to meet a thirty (30) day notice requirement will be deemed given, and the thirty (30) days deemed to commence on the first day of the calendar month following the date of receipt of said notice. Any termination permitted by other sections contingent upon a thirty (30) day notice will then be effective on the last day of the calendar month following receipt of said notice. If expiration date of lease is not on the last day of the calendar month, then thirty (30) days notice is required to conform to the expiration dates.

19. **DESTRUCTION OR DAMAGE TO PREMISES:** If the dwelling unit or premises are damaged or destroyed by fire or casualty to the extent that normal use and occupancy of the dwelling unit is substantially impaired, the Tenant may:
(a) immediately vacate the premises and notify the Landlord in writing within seven days thereafter of Tenant's intention to terminate the rental agreement, in which case the rental agreement terminates as of the date of vacating; or
(b) if continued occupancy is lawful, vacate any part of the dwelling unit rendered unusable by the fire or casualty, in which case the Tenant's liability for rent is reduced in proportion to the diminution in the fair-market rental value of the dwelling unit.

Unless the fire or casualty was due to the tenant's negligence or otherwise caused by the tenant, if the rental agreement is terminated, the landlord shall return security deposit to the tenant with proper accounting as required by law. Accounting for rent in the event of termination or apportionment must be made as of the date of the fire or casualty. The Landlord shall withhold the tenant's security deposit if the fire or casualty was due to the tenant's negligence or otherwise caused by the tenant, with proper accounting as required by law.

20. **CONDEMNATION:** Tenant hereby waives any injury, loss or damage, or claim therefore against Landlord resulting from any exercise of a power of eminent domain of all or any part of the rented premises or surrounding grounds of which they are a part. All awards of the condemning authority for the taking of land, parking areas, or buildings shall belong exclusively to the Landlord. In the event substantially all of the rented premises shall be taken, this Rental Agreement shall terminate as of the date the right to possession vested in the condemning authority and rent shall be apportioned as of that date. In the event any part of the property and/or building or buildings of which the rented premises are a part (whether or not the rented premises shall be affected) shall be taken as a result of the exercise of a power of eminent domain, and the remainder shall not, in the opinion of the Landlord, constitute an economically feasible operating unit, Landlord may, by written notice to Tenant given within sixty (60) days after the date of taking, terminate this Rental Agreement as of a date set out in the notice not earlier than thirty (30) days after the date of the notice; rent shall be apportioned as of termination date.

21. **ABSENCE, NON-USE AND ABANDONMENT:** The unexplained absence of a Tenant from a dwelling unit for a period of 15 days after default in the payment of rent must be construed as abandonment of the dwelling unit. If the Tenant abandons the dwelling unit for a term beginning before the expiration of the rental agreement, it terminates as of the date of the new tenancy, subject to the other Landlord's remedies. If the Landlord fails to use reasonable efforts to rent the dwelling unit at a fair rental or if the Landlord accepts the abandonment as a surrender, the rental agreement is considered to be terminated by the Landlord as of the date the Landlord has notice of the abandonment. When a dwelling unit has been abandoned or the rental agreement has come to an end and the Tenant has removed a substantial portion of personal property or voluntarily and permanently terminated the utilities and has left personal property in the dwelling unit or on the premises with a fair-market value of \$500 or less, the Landlord may enter the dwelling unit, using forcible entry if required, and dispose of the property.

22. **SECURITY DEPOSIT:** Tenant agrees to deposit with Landlord a security deposit of \$ _____ to be held as security for the full and faithful performance by the Tenant of all terms and conditions herein, it being understood and agreed to that no part of this deposit is to be applied to any rent which may become due under this rental agreement.

Upon termination of the tenancy, property or money held by the Landlord as security may be applied to the payment of accrued rent and the amount of loss of rents or damages which the Landlord has suffered by reason of the Tenant's noncompliance with the South Carolina Residential Landlord and Tenant Act. Any deduction from the security deposit must be itemized by the Landlord in a written notice of the Tenant together with the amount due, if any, within 30 days after termination of the tenancy and delivery of possession and demand by the Tenant, whichever is later. The Tenant shall provide the Landlord in writing with a forwarding address or new address to which the written notice and amount due from the Landlord may be sent.

If the Tenant fails to provide the Landlord with the forwarding or new address and fails to return the following: pool tags, keys for mail box, keys to unit (including deadbolt, storage area), other _____, the Tenant is not entitled to damages under this subsection provided the Landlord (1) had no notice of the Tenant's whereabouts; and, (2) mailed the written notice and amount due, if any, to the Tenant's last known address. In the event the security deposit is not sufficient to pay all charges due, Tenant shall pay said charges within five (5) business days after receiving notice from the Landlord.

23. **NONCOMPLIANCE WITH RENTAL AGREEMENT OR FAILURE TO PAY RENT:** If there is a noncompliance by the Tenant with the rental agreement other than nonpayment of rent or a noncompliance with Paragraph 12 above, the Landlord may deliver a written notice to the Tenant specifying the acts and omissions constituting the breach and that the rental agreement will terminate upon a date not less than 14 days after receipt of the notice, if the breach is not remedied in 14 days.

The rental agreement shall terminate as provided in the notice except that: If the breach is remediable by repairs or otherwise and the Tenant adequately remedies the breach before the date specified in the notice, or if such remedy cannot be completed within 14 days, but is commenced within the 14-day period and is pursued in good faith to completion within a reasonable time, the rental agreement shall not terminate by reason of the breach.

If rent is unpaid when due and the Tenant fails to pay rent within five days from the date due, the Landlord may terminate the rental agreement provided the Landlord has given the Tenant written notice of nonpayment and Landlord's intention to terminate the rental agreement. If the rent is not paid within that period, said notice is contained herein Paragraph 6.

The Landlord may recover actual damages and obtain injunctive relief in magistrate's or circuit court without posting bond for any noncompliance by the Tenant with the rental agreement or Paragraph 12 above. If the Tenant's noncompliance is willful other than nonpayment of rent, the Landlord may recover reasonable attorney's fees. If the Tenant's nonpayment of rent is not in good faith, the Landlord is entitled to reasonable attorney's fees.

If there is noncompliance by the Tenant with Paragraph 12 above, materially affecting health and safety that can be remedied by repair, replacement of a damaged item, or cleaning and the Tenant fails to comply as promptly as conditions require in case of emergency, or within fourteen (14) days after written notice by the Landlord specifying the breach and requesting that the Tenant remedy it within that period of time, the Landlord may enter the dwelling unit and cause the work to be done in a workmanlike manner and shall in addition have the remedies available under the South Carolina Residential Landlord Tenant Act.

If there is noncompliance by the Tenant with Paragraph 12 above materially affecting health and safety other than as set forth in the preceding paragraph, and the Tenant fails to comply as promptly as conditions require in case of emergency, or within fourteen (14) days after written notice by the Landlord if it is not an emergency, specifying the breach and requesting that the Tenant remedy within that period of time, the Landlord may terminate the rental agreement. If the rental agreement is terminated, the Landlord has a right to possession and for rent and a separate claim for actual damages for breach of the rental agreement and reasonable attorney's fees. **Any claim not satisfied by Tenant may be turned in to the credit bureau or collection agency.**

24. **REMEDY AFTER TERMINATION:** If the rental agreement is terminated, the Landlord has a right to possession, for rent, and a separate claim for actual damages for breach of the rental agreement, reasonable attorney's fees, collection costs, and court costs.
25. **NOTICE:** A Landlord receives notice when it is delivered at the place of business of the Landlord through which the rental agreement was made or at any place held out by Landlord as the place of receipt of the communication.
26. **PROHIBITIVE EQUIPMENT/FURNITURE:** Tenant agrees not to place antennas, satellite dishes, waterbeds, and auxiliary heaters without written permission from Landlord.
27. **INVENTORY:** Any furnishing and equipment to be furnished by Landlord shall be set out in a special inventory. The inventory shall be signed by both Tenant and Landlord concurrently with this Rental Agreement and shall be a part of this Agreement.

Tenant shall be responsible for the animal, its behavior, and any damage done by the animal. The Landlord shall have the right to withdraw consent and demand removal of any previously permitted animal upon the first complaint registered against such animal or upon evidence of injury or damage to person or property caused by the animal.
29. **WAIVER:** A Tenant is considered to have waived violation of a Landlord's duty to maintain the premises as set forth by the Rental Agreement or violation of the Landlord's duties under the South Carolina Residential Landlord and Tenant Act, as defense in an action for possession based upon nonpayment of rent, or in an action for rent concerning a period where Landlord has no notice of the violation of the duties, fourteen (14) days before rent is due for violations involving services other than essential services, or the Landlord has no notice before rent is due which provides a reasonable opportunity to make emergency repairs necessary for the provision of essential services. No modification, change, or cancellation hereof shall be valid unless in writing and executed by all parties hereto. No representation or promise has been made by either party hereto except as herein stated.
30. **PEACEFUL ENJOYMENT:** The Landlord covenants that the Tenant, on paying the rent and performing the covenants hereof, shall and may peaceably and quietly have, hold, and enjoy the rented premises for the term mentioned without hindrance or interruption by the Landlord.
31. **PROVISIONS:** The provisions of this Rental Agreement shall be binding upon and inure to the benefit of the Landlord and the Tenant, and their respective successors, legal representatives, and assigns.
32. **SUBORDINATION:** Tenant's rights are subject to any bona fide mortgage which now covers said premises and which may hereafter be placed on said premises by Landlord. Tenant shall upon request by Landlord execute a subordination of its rights under this Rental Agreement to any mortgage given by Landlord hereunder, whether to secure construction or permanent or other financing. Resident shall upon request by Landlord promptly execute a certification of good standing certifying the terms of this Rental Agreement, its due execution, the rental provisions hereof, or the terms of amendments hereto, if any, and any other information reasonably requested.
33. **RENTAL RATE ADJUSTMENT:** On and after the expiration of the initial term of this lease, the Landlord, at Landlord's discretion, may alter the rental rate in effect provided only that written notice of such alteration is delivered as first class mail to the US Postal Service, postage prepaid at least fifteen (15) days prior to the effective date of alteration.
34. **TRUST ACCOUNT INTEREST: ACCORDING TO THE RULES AND REGULATIONS OF THE SOUTH CAROLINA REAL ESTATE COMMISSION AND THE CODE OF LAWS OF SOUTH CAROLINA, 1976, AS AMENDED, THE BROKER-IN-CHARGE OR PROPERTY MANAGER-IN-CHARGE HAS THE OPTION TO PLACE TENANT'S SECURITY DEPOSIT INTO AN INTEREST BEARING ACCOUNT AND TO RETAIN ALL INTEREST INCURRED IN SAID ACCOUNT. TENANT AGREES TO AND UNDERSTANDS THAT THE TENANT HAS BEEN INFORMED OF TENANT'S RIGHT TO OWNERSHIP OF THE INTEREST BUT RELINQUISHES TO THE BROKER-IN-CHARGE OR PROPERTY MANAGER-IN-CHARGE BY THIS WRITTEN AGREEMENT SAID RIGHT OF OWNERSHIP.**
35. **BROKER LIABILITY LIMITATION:** *Parties agree Brokers provided Parties with benefits, services, assistance, and value in bringing about this Contract. Are You Planning to Buy or Rent a Home Built Before 1978?

Did you know that many homes built before 1978 have **lead-based paint**? Lead from paint, chips, and dust can pose serious health hazards.

Read this entire brochure to learn:

- How lead gets into the body
- How lead affects health
- What you can do to protect your family
- Where to go for more information

Before renting or buying a pre-1978 home or apartment, federal law requires:

- Sellers must disclose known information on lead-based paint or lead-based paint hazards before selling a house.
- Real estate sales contracts must include a specific warning statement about lead-based paint. Buyers have up to 10 days to check for lead.
- Landlords must disclose known information on lead-based paint and lead-based paint hazards before leases take effect. Leases must include a specific warning statement about lead-based paint.

If undertaking renovations, repairs, or painting (RRP) projects in your pre-1978 home or apartment:

- Read EPA's pamphlet, *The Lead-Safe Certified Guide to Renovate Right*, to learn about the lead-safe work practices that contractors are required to follow when working in your home (see page 12).

Simple Steps to Protect Your Family from Lead Hazards

If you think your home has lead-based paint:

- Don't try to remove lead-based paint yourself.
- Always keep painted surfaces in good condition to minimize deterioration.
- Get your home checked for lead hazards. Find a certified inspector or risk assessor at epa.gov/lead.
- Talk to your landlord about fixing surfaces with peeling or chipping paint.
- Regularly clean floors, window sills, and other surfaces.
- Take precautions to avoid exposure to lead dust when remodeling.
- When renovating, repairing, or painting, hire only EPA- or state-approved Lead-Safe certified renovation firms.
- Before buying, renting, or renovating your home, have it checked for lead-based paint.
- Consult your health care provider about testing your children for lead. Your pediatrician can check for lead with a simple blood test.
- Wash children's hands, bottles, pacifiers, and toys often.
- Make sure children eat healthy, low-fat foods high in iron, calcium, and vitamin C.
- Remove shoes or wipe soil off shoes before entering your house.

Lead Gets into the Body in Many Ways

Adults and children can get lead into their bodies if they:

- Breathe in lead dust (especially during activities such as renovations, repairs, or painting that disturb painted surfaces).
- Swallow lead dust that has settled on food, food preparation surfaces, and other places.
- Eat paint chips or soil that contains lead.

Lead is especially dangerous to children under the age of 6.

- At this age, children's brains and nervous systems are more sensitive to the damaging effects of lead.
- Children's growing bodies absorb more lead.
- Babies and young children often put their hands and other objects in their mouths. These objects can have lead dust on them.

Women of childbearing age should know that lead is dangerous to a developing fetus.

- Women with a high lead level in their system before or during pregnancy risk exposing the fetus to lead through the placenta during fetal development.

Health Effects of Lead

Lead affects the body in many ways. It is important to know that even exposure to low levels of lead can severely harm children.

In children, exposure to lead can cause:

- Nervous system and kidney damage
- Learning disabilities, attention-deficit disorder, and decreased intelligence
- Speech, language, and behavior problems
- Poor muscle coordination
- Decreased muscle and bone growth
- Hearing damage

While low-lead exposure is most common, exposure to high amounts of lead can have devastating effects on children, including seizures, unconsciousness, and, in some cases, death.

Although children are especially susceptible to lead exposure, lead can be dangerous for adults, too.

In adults, exposure to lead can cause:

- Harm to a developing fetus
- Increased chance of high blood pressure during pregnancy
- Fertility problems (in men and women)
- High blood pressure
- Digestive problems
- Nerve disorders
- Memory and concentration problems
- Muscle and joint pain

Check Your Family for Lead

Get your children and home tested if you think your home has lead.

Children's blood lead levels tend to increase rapidly from 6 to 12 months of age, and tend to peak at 18 to 24 months of age.

Consult your doctor for advice on testing your children. A simple blood test can detect lead. Blood lead tests are usually recommended for:

- Children at ages 1 and 2
- Children or other family members who have been exposed to high levels of lead
- Children who should be tested under your state or local health screening plan

Your doctor can explain what the test results mean and if more testing will be needed.

Where Lead-Based Paint Is Found

In general, the older your home or childcare facility, the more likely it has lead-based paint.¹

Many homes, including private, federally-assisted, federally-owned housing, and childcare facilities built before 1978 have lead-based paint. In 1978, the federal government banned consumer uses of lead-containing paint.²

Learn how to determine if paint is lead-based paint on page 7.

Lead can be found:

- In homes and childcare facilities in the city, country, or suburbs,
- In private and public single-family homes and apartments,
- On surfaces inside and outside of the house, and
- In soil around a home. (Soil can pick up lead from exterior paint or other sources, such as past use of leaded gas in cars.)

Learn more about where lead is found at [epa.gov/lead](https://www.epa.gov/lead).

¹ “Lead-based paint” is currently defined by the federal government as paint with lead levels greater than or equal to 1.0 milligram per square centimeter (mg/cm), or more than 0.5% by weight.

² “Lead-containing paint” is currently defined by the federal government as lead in new dried paint in excess of 90 parts per million (ppm) by weight.

Identifying Lead-Based Paint and Lead-Based Paint Hazards

Deteriorating lead-based paint (peeling, chipping, chalking, cracking, or damaged paint) is a hazard and needs immediate attention. **Lead-based paint** may also be a hazard when found on surfaces that children can chew or that get a lot of wear and tear, such as:

- On windows and window sills
- Doors and door frames
- Stairs, railings, banisters, and porches

Lead-based paint is usually not a hazard if it is in good condition and if it is not on an impact or friction surface like a window.

Lead dust can form when lead-based paint is scraped, sanded, or heated. Lead dust also forms when painted surfaces containing lead bump or rub together. Lead paint chips and dust can get on surfaces and objects that people touch. Settled lead dust can reenter the air when the home is vacuumed or swept, or when people walk through it. EPA currently defines the following levels of lead in dust as hazardous:

- 40 micrograms per square foot ($\mu\text{g}/\text{ft}^2$) and higher for floors, including carpeted floors
- 250 $\mu\text{g}/\text{ft}^2$ and higher for interior window sills

Lead in soil can be a hazard when children play in bare soil or when people bring soil into the house on their shoes. EPA currently defines the following levels of lead in soil as hazardous:

- 400 parts per million (ppm) and higher in play areas of bare soil
- 1,200 ppm (average) and higher in bare soil in the remainder of the yard

Remember, lead from paint chips—which you can see—and lead dust—which you may not be able to see—both can be hazards.

The only way to find out if paint, dust, or soil lead hazards exist is to test for them. The next page describes how to do this.

Checking Your Home for Lead

You can get your home tested for lead in several different ways:

- A lead-based paint **inspection** tells you if your home has lead-based paint and where it is located. It won't tell you whether your home currently has lead hazards. A trained and certified testing professional, called a lead-based paint inspector, will conduct a paint inspection using methods, such as:
 - Portable x-ray fluorescence (XRF) machine
 - Lab tests of paint samples
- A **risk assessment** tells you if your home currently has any lead hazards from lead in paint, dust, or soil. It also tells you what actions to take to address any hazards. A trained and certified testing professional, called a risk assessor, will:
 - Sample paint that is deteriorated on doors, windows, floors, stairs, and walls
 - Sample dust near painted surfaces and sample bare soil in the yard
 - Get lab tests of paint, dust, and soil samples
- A combination inspection and risk assessment tells you if your home has any lead-based paint and if your home has any lead hazards, and where both are located.

Be sure to read the report provided to you after your inspection or risk assessment is completed, and ask questions about anything you do not understand.

Checking Your Home for Lead, continued

In preparing for renovation, repair, or painting work in a pre-1978 home, Lead-Safe Certified renovators (see page 12) may:

- Take paint chip samples to determine if lead-based paint is present in the area planned for renovation and send them to an EPA-recognized lead lab for analysis. In housing receiving federal assistance, the person collecting these samples must be a certified lead-based paint inspector or risk assessor
- Use EPA-recognized tests kits to determine if lead-based paint is absent (but not in housing receiving federal assistance)
- Presume that lead-based paint is present and use lead-safe work practices

There are state and federal programs in place to ensure that testing is done safely, reliably, and effectively. Contact your state or local agency for more information, visit [epa.gov/lead](https://www.epa.gov/lead), or call **1-800-424-LEAD (5323)** for a list of contacts in your area.³

What You Can Do Now to Protect Your Family

If you suspect that your house has lead-based paint hazards, you can take some immediate steps to reduce your family's risk:

- If you rent, notify your landlord of peeling or chipping paint.
- Keep painted surfaces clean and free of dust. Clean floors, window frames, window sills, and other surfaces weekly. Use a mop or sponge with warm water and a general all-purpose cleaner. (Remember: never mix ammonia and bleach products together because they can form a dangerous gas.)
- Carefully clean up paint chips immediately without creating dust.
- Thoroughly rinse sponges and mop heads often during cleaning of dirty or dusty areas, and again afterward.
- Wash your hands and your children's hands often, especially before they eat and before nap time and bed time.
- Keep play areas clean. Wash bottles, pacifiers, toys, and stuffed animals regularly.
- Keep children from chewing window sills or other painted surfaces, or eating soil.
- When renovating, repairing, or painting, hire only EPA- or state-approved Lead-Safe Certified renovation firms (see page 12).
- Clean or remove shoes before entering your home to avoid tracking in lead from soil.
- Make sure children eat nutritious, low-fat meals high in iron, and calcium, such as spinach and dairy products. Children with good diets absorb less lead.

Reducing Lead Hazards

Disturbing lead-based paint or removing lead improperly can increase the hazard to your family by spreading even more lead dust around the house.

- In addition to day-to-day cleaning and good nutrition, you can **temporarily** reduce lead-based paint hazards by taking actions, such as repairing damaged painted surfaces and planting grass to cover lead-contaminated soil. These actions are not permanent solutions and will need ongoing attention.
- You can minimize exposure to lead when renovating, repairing, or painting by hiring an EPA- or state-certified renovator who is trained in the use of lead-safe work practices. If you are a do-it-yourselfer, learn how to use lead-safe work practices in your home.
- To remove lead hazards permanently, you should hire a certified lead abatement contractor. Abatement (or permanent hazard elimination) methods include removing, sealing, or enclosing lead-based paint with special materials. Just painting over the hazard with regular paint is not permanent control.

Always use a certified contractor who is trained to address lead hazards safely.

- Hire a Lead-Safe Certified firm (see page 12) to perform renovation, repair, or painting (RRP) projects that disturb painted surfaces.
- To correct lead hazards permanently, hire a certified lead abatement professional. This will ensure your contractor knows how to work safely and has the proper equipment to clean up thoroughly.

Certified contractors will employ qualified workers and follow strict safety rules as set by their state or by the federal government.

Reducing Lead Hazards, continued

If your home has had lead abatement work done or if the housing is receiving federal assistance, once the work is completed, dust cleanup activities must be conducted until clearance testing indicates that lead dust levels are below the following levels:

- 40 micrograms per square foot ($\mu\text{g}/\text{ft}^2$) for floors, including carpeted floors
- 250 $\mu\text{g}/\text{ft}^2$ for interior window sills
- 400 $\mu\text{g}/\text{ft}^2$ for window troughs

For help in locating certified lead abatement professionals in your area, call your state or local agency (see pages 14 and 15), or visit epa.gov/lead, or call 1-800-424-LEAD.

Renovating, Repairing or Painting a Home with Lead-Based Paint

If you hire a contractor to conduct renovation, repair, or painting (RRP) projects in your pre-1978 home or childcare facility (such as pre-school and kindergarten), your contractor must:

- Be a Lead-Safe Certified firm approved by EPA or an EPA-authorized state program
- Use qualified trained individuals (Lead-Safe Certified renovators) who follow specific lead-safe work practices to prevent lead contamination
- Provide a copy of EPA's lead hazard information document, *The Lead-Safe Certified Guide to Renovate Right*

RRP contractors working in pre-1978 homes and childcare facilities must follow lead-safe work practices that:

- **Contain the work area.** The area must be contained so that dust and debris do not escape from the work area. Warning signs must be put up, and plastic or other impermeable material and tape must be used.
- **Avoid renovation methods that generate large amounts of lead-contaminated dust.** Some methods generate so much lead-contaminated dust that their use is prohibited. They are:
 - Open-flame burning or torching
 - Sanding, grinding, planing, needle gunning, or blasting with power tools and equipment not equipped with a shroud and HEPA vacuum attachment
 - Using a heat gun at temperatures greater than 1100°F
- **Clean up thoroughly.** The work area should be cleaned up daily. When all the work is done, the area must be cleaned up using special cleaning methods.
- **Dispose of waste properly.** Collect and seal waste in a heavy duty bag or sheeting. When transported, ensure that waste is contained to prevent release of dust and debris.

To learn more about EPA's requirements for RRP projects visit epa.gov/getleadsafe, or read *The Lead-Safe Certified Guide to Renovate Right*.

Other Sources of Lead

Lead in Drinking Water

The most common sources of lead in drinking water are lead pipes, faucets, and fixtures.

Lead pipes are more likely to be found in older cities and homes built before 1986.

You can't smell or taste lead in drinking water.

To find out for certain if you have lead in drinking water, have your water tested.

Remember older homes with a private well can also have plumbing materials that contain lead.

Important Steps You Can Take to Reduce Lead in Drinking Water

- Use only cold water for drinking, cooking and making baby formula. Remember, boiling water does not remove lead from water.
- Before drinking, flush your home's pipes by running the tap, taking a shower, doing laundry, or doing a load of dishes.
- Regularly clean your faucet's screen (also known as an aerator).
- If you use a filter certified to remove lead, don't forget to read the directions to learn when to change the cartridge. Using a filter after it has expired can make it less effective at removing lead.

Contact your water company to determine if the pipe that connects your home to the water main (called a service line) is made from lead. Your area's water company can also provide information about the lead levels in your system's drinking water.

For more information about lead in drinking water, please contact EPA's Safe Drinking Water Hotline at 1-800-426-4791. If you have other questions about lead poisoning prevention, call 1-800 424-LEAD.*

Call your local health department or water company to find out about testing your water, or visit epa.gov/safewater for EPA's lead in drinking water information. Some states or utilities offer programs to pay for water testing for residents. Contact your state or local water company to learn more.

* Hearing- or speech-challenged individuals may access this number through TTY by calling the Federal Relay Service at 1-800-877-8339.

Other Sources of Lead, continued

- **Lead smelters** or other industries that release lead into the air.
- **Your job.** If you work with lead, you could bring it home on your body or clothes. Shower and change clothes before coming home. Launder your work clothes separately from the rest of your family's clothes.
- **Hobbies** that use lead, such as making pottery or stained glass, or refinishing furniture. Call your local health department for information about hobbies that may use lead.
- Old **toys** and **furniture** may have been painted with lead-containing paint. Older toys and other children's products may have parts that contain lead.⁴
- Food and liquids cooked or stored in **lead crystal** or **lead-glazed pottery or porcelain** may contain lead.
- Folk remedies, such as "**greta**" and "**azarcon**," used to treat an upset stomach.

⁴ In 1978, the federal government banned toys, other children's products, and furniture with lead-containing paint. In 2008, the federal government banned lead in most children's products. The federal government currently bans lead in excess of 100 ppm by weight in most children's products.

Lead From Paint, Dust, and Soil in and Around Your Home Can Be Dangerous if Not Managed Properly

- Children under 6 years old are most at risk for lead poisoning in your home.
- Lead exposure can harm young children and babies even before they are born.
- Homes, schools, and child care facilities built before 1978 are likely to contain lead-based paint.
- Even children who seem healthy may have dangerous levels of lead in their bodies.
